EXPERIENCE:

Golang Backend Developer — 08/2021-12/2023
Blockdaemon, Los Angeles CA

- Developing and maintaining **API** of Blockdaemon WebApp.
- Implementing **Stripe API** and stripe hooks into the backend.
- Worked on **OKTA**. Created environments and implemented Auth into the app.
- Developing **GRPC** services with **Golang (GO)**.
- Worked closely on Databases with **SQL Boiler**.

React Developer — 8/2020
The Famous Group, Los Angeles CA

- Created static registration webpages for the World Wrestling Entertainment, Inc (WWE)
- Worked and styled WWE web pages with **React** and CSS for each event

Full Stack Developer — 08/2019-03/2021
Retirement Insider, Los Angeles CA

- Developed Lambda applications and **APIs** using Golang. These applications are developed via **AWS** (**Lambda**, **DynamoDB**, **SQS**, **SSM Parameter Store**, **RDS**, **EC2**, **S3**).
- Worked with **Shopify API**. Full automation of products management for our shops.
- Developed system on **Salesforce** CRM. Created custom interfaces, apps and developed applications using **APEX**.
- Managed **GSuite** platform, utilizing its resources and tools. Also worked with **GSuite APIs**.

Full Stack Developer — 11/2018-08/2019
Good Dog, Los Angeles CA

- Built a prototype full stack web application.
- Implemented flexible components for uploading media assets to **AWS S3** buckets.
- Utilized **Twilio API** to create SMS text notifications to increase user engagements.

Full Stack Developer — 08/2016-09/2018
Cryptomind, Los Angeles CA

- Developed **C#** desktop application. Users traded computing power for cryptocurrency tokens that traded on an open market.
- Performed marketing tasks and interface with customers to increase user engagement.

EDUCATION AND OTHER:

Los Angeles Valley College - Associate of Science - Computer Science — 12/2022

TheHackathon.us, Los Angeles CA (2nd Place) — 02/2019

Provided solutions to improve personal and business commutes by leveraging the internet of things, smart sensors, automated vehicles, and to innovate transportation platforms such as Uber or Lyft to decrease congestion and to reduce pollution. This ultimately improved the quality of life for people living in metropolitan cities.

Kubernetes/Dockers: Docker Mastery: with Kubernetes +Swarm (Udemy 2019) — 2019
